

Kehilla COVID Public Health Protocols

Updated as of May 20, 2022

Subject to change as public health conditions change

Everyone attending any program, event, service or meeting held at Kehilla (indoor or outdoor) who is eligible for vaccination is required to be fully vaccinated and will be asked to show evidence upon entry. Full vaccination now includes booster shots for those eligible, in accordance with the [recommendations of the California Department of Public Health](#).

Those who are not fully vaccinated must bring their own rapid COVID antigen test and test on site, and will be admitted if the result is negative. The one exception is that young people under five who come for outdoor Kehilla events do not need to be antigen tested.

We are requesting that everyone take a rapid antigen test before coming to an indoor Kehilla event or service. This new protocol is designed to decrease the possibility that COVID infections will be spread at Kehilla.

N95, KN95 or KF94 masks will be required indoors for all participants, except leaders who may be unmasked while leading and will take a rapid antigen test beforehand. The one exception will be for when people are eating and/or drinking in a room designated for a meal. Adult size N95/KN95/KF94 masks will be provided for those who don't have them. We are currently making an exception for children up to age twelve who may wear any well fitting masks (see California Department of Public Health's mask [recommendations](#)) and for anyone who is medically unable to wear an N95/KN95/KF94 mask. We highly recommend that they double mask with a surgical mask and cloth mask.

Anyone experiencing ANY symptoms of potentially contagious illness should remain at home and access Kehilla events virtually, regardless of vaccination status or even if you have received a negative COVID test result.

There will be no COVID-based limits on attendance in the Kehilla building. Building capacity limits will apply.

Eating and drinking is allowed indoors only in designated rooms, as long as an outdoor eating option is available.

Kehilla will provide maximum air filtration and ventilation. Doors and windows will be opened whenever possible.

These protocols will apply to all Kehilla activities that take place at the Kehilla building, including rentals. Specific Kehilla programs, activities or rentals, including Kehilla School, may issue additional guidelines that are more strict than these.

These protocols are subject to change at any time if public health conditions change.
